PROFESSIONAL SUMMARY

AI-focused Software Engineer building production RAG, agentic AI, NL2SQL, and cloud-deployed automation systems. Hands-on with Azure AI Search/OpenAI, LangChain/LangGraph, MCP, Playwright, FastAPI, vector databases, OCR ingestion, and client-facing delivery for enterprise AI workflows.

TECHNICAL SKILLS

AI/ML and RAG: LangChain, LangGraph, RAG design, RAPTOR-style retrieval, ChromaDB, vector search, embeddings, OCR, XGBoost, QLoRA/LoRA
Agents and Evaluation: MCP, tool calling, NL2SQL, multi-agent orchestration, Playwright automation, SSE, prompt engineering, test generation, QA metrics awareness
Backend and Cloud: Python, FastAPI, Node.js, REST APIs, pytest, Azure AI Search, Azure OpenAI, Azure Function App, Azure Bot Service, Azure SQL
DevOps, Data, Other: Docker, Kubernetes, Git/GitHub, Linux, SQL, MongoDB, GeoPandas, OpenAPI/Swagger, slight frontend exposure

EXPERIENCE

Software Engineer Aug 2025 – Present
Logic Powered Solutions F-5, Islamabad, Pakistan

- Enterprise RAG:** Built and deployed Watermarks Construction knowledge assistant using Azure AI Search, Azure OpenAI, SharePoint-indexed documents, OCR ingestion, Microsoft Teams/Copilot delivery, and citation-grounded answers.
- Advanced Retrieval:** Implemented document chunking, vector/hybrid retrieval, RAPTOR-style hierarchical summaries, index refresh workflows, and retrieval experiments for construction-domain knowledge.
- SQL Agent:** Developed schema-aware NL2SQL agent in Python for plain-English querying across 3 Azure SQL databases; deployed through Azure Function App and Azure Bot Service.
- AI QA Agent:** Built MCP + GPT-4o + Playwright agent that explores web apps, discovers flows, writes/executes tests, streams progress through SSE, and supports demos for stakeholders.
- Delivery:** Worked directly with international stakeholders on requirements, demos, issue triage, and translating product needs into reliable AI behavior.

AI/ML Intern Jun 2025 – Aug 2025
A Hamson Rawalpindi, Pakistan

- Built an internal LangChain RAG assistant for documentation lookup, chunking internal knowledge and grounding answers in retrieved context.
- Containerized Python services with Docker, supported Kubernetes deployment workflows, and assisted with database/UI reliability improvements.

PROJECTS

Enterprise RAG Assistant | *Azure AI Search, Azure OpenAI, Teams, SharePoint, Python* | [GitHub](#)

- Production knowledge assistant over SharePoint-indexed documents with OCR ingestion, vector/hybrid retrieval, citations, and Microsoft Teams/Copilot delivery.
- Implemented chunking, retrieval experiments, RAPTOR-style hierarchical summaries, index refresh workflows, and Azure-hosted bot infrastructure.

GeoVision | *FastAPI, XGBoost, ChromaDB, GeoPandas, React* | [GitHub](#)

- Multi-agent land-use planning system with XGBoost suitability scoring, RAG zoning context, GIS spatial optimization, async FastAPI jobs, and map-based plan comparison.
- Combined environment, zoning, and spatial agents into a full planning workflow with status polling, merged outputs, and parcel-level analysis.

Natural Language SQL Agent | *Python, Azure Function App, Azure Bot Service, Azure SQL*

- Schema-aware NL2SQL agent that converts plain-English business questions into SQL across 3 Azure SQL databases and returns readable answers.
- Designed deployment flow through Azure Function App and Azure Bot Service with guardrails around query construction and result explanation.

B.M.O Interactive AI Character | *FastAPI, ChromaDB, Whisper, React Three Fiber* | [GitHub](#)

- Voice-enabled 3D conversational AI character with vector memory, speech-to-text input, OpenAI responses, voice conversion, and state-driven expressions.

EDUCATION

FAST University Pakistan
B.Sc. Software Engineering 2021 – 2026

- FYP: GeoVision, multi-agent AI land-use planning with XGBoost, RAG, GIS optimization, FastAPI, and React.
- Relevant coursework: Artificial Intelligence, Machine Learning, Database Systems, Software Architecture, Web Engineering, Operating Systems.

ADDITIONAL

Communication: Client demos, requirement gathering, progress reporting, and translating AI behavior for non-technical users
Languages: English professional working proficiency, Urdu native
